RAPID SELF-REPAIRING ROLL-UP DOOR

DYNAMICROLL® CLEAN ROOMS

DynamicRoll® CleanRooms High Speed Doors are self-repairing, meaning that if the door curtain comes out of their guides (for example, in the event of impact with a forklift) the system will automatically reset the curtain back into the guide on the next close cycle. DynamicRoll® CleanRooms columns are made from stainless steel. The motor is enclosed in the heading and comes as standard with a counter weight for emergency opening. Modular construction allows easy interchange of door parts.

At the heart of the DynamicRoll® CleanRooms door design is our innovative curtain edge that firmly holds the curtain into the side guides. If impacted, the curtain will release from the side guide and automatically reset on the next door cycle. Because there are no metal parts within the curtain design, damage is kept to a minimum. A double ballasted bottom edge ensures there is always a good seal to the floor.
